

# Interstate 10 Corridor Study: Jct. I-8 to Tangerine Road

## FACT SHEET

### Project Overview

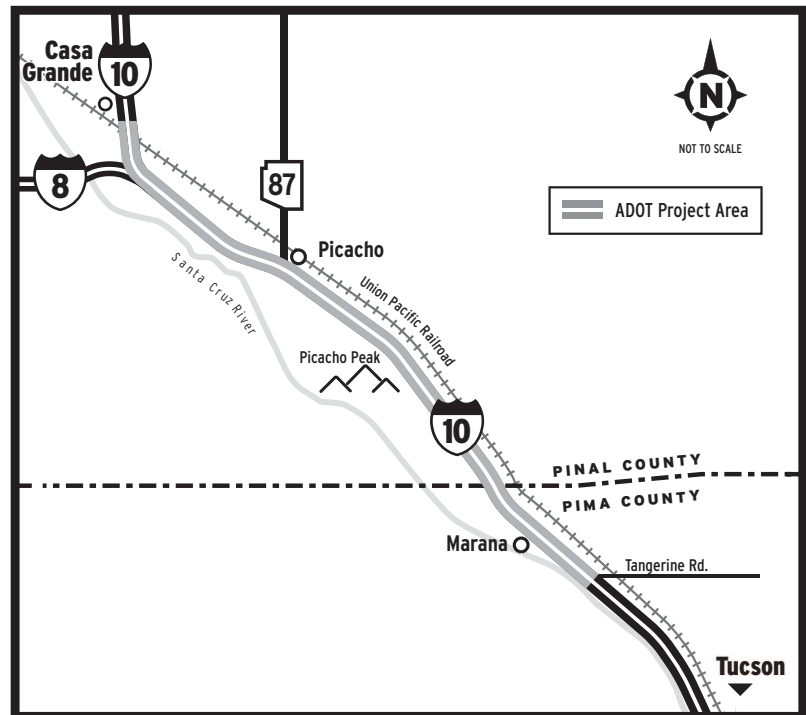

The Arizona Department of Transportation (ADOT) is studying long-term improvements for 46 miles of Interstate 10, between Interstate 8 at milepost 196 in Casa Grande and Tangerine Road at milepost 240 in Marana. The goal of the study is to establish a plan to guide the development of I-10 through the year 2030.

### What the Study will Evaluate

- Highway deficiencies
- Freight mobility
- Frontage roads
- Traffic interchanges
- Drainage features
- Environmental issues

### Project Schedule and Purpose

- Began in the spring of 2006
- Anticipated completion in the winter of 2010/2011
- Will produce an Access Management Plan and Design Concept Report
- Will follow the National Environmental Policy Act process to evaluate alternatives for improvements and document potential impacts to the social, natural and cultural environment
- Will identify and incorporate environmental mitigation measures into future I-10 improvements
